 A process of extending the useful shelf life of minimally processed fruits and vegetables which includes the step of treating the fruits and vegetables with a flavonoid.

 A process as claimed in claim 1 in which the minimally processed fruits or vegetables are sprayed or immersed in a solution containing a flavonoid and then packaged in suitable packaging for minimally processed fruits and vegetables.

- 3. A process as claimed in claim 1 wherein oranges are juiced and a flavonoid is added to the juice.
- 4. A process as claimed in claim 3 where the oranges are navel oranges.
- 5. A process as claimed in claim 3 wherein alpha lipoic acid is also added to the juice
- 6. Orange juice produced by the process of claim 3.
- 7. A process as claimed in claim 1 in which a food grade antioxidant is combined with the flavonoid.
- 8. A process as claimed in claim 7 in which the food grade antioxidant is selected from one or more of ascorbic acid, erythorbic acid, lipoic acid or salts thereof
 - 9. Minimally processed fruits vegetables or nuts treated by the process of claim 7.
- 10.A preservative composition for use in the process of claim 7 which includes a flavonoid and an antioxidant selected from one or more of ascorbic acid, erythorbic acid, lipoic acid and salts thereof in the ratio of 1:50 to 1:150.
